Circolare n. 226

Cesena, 7th April 2022

Our school supports the **2022 STEM Discovery Campaign** (a joint international initiative organised by **Scientix**) that aims to celebrate careers and studies in the fields of Science, Technology, Engineering and Mathematics (STEM).

As a contribution to the campaign, we will organise the live event:

"UNDERSTANDING AND ACTING FOR A HEALTHY PLASTIC FREE SEA"

Time and place of the event: **April 12th 2022**, at **11.00** from our school's Multimedia classroom.
 Working language: English.

Link: <https://youtu.be/mGZfoBqvOLQ>

Class 4D will be hosting the event, and will be joined by eTwinning partner schools:

- **Alytus Jotvingiai gymnasium, Lithuania** <https://jotvingiugimnazija.lt/>
- **Gymnasio of Anthousa, Greece** <https://blogs.sch.gr/gymanthous>

The event will focus on examining and understanding the paths of plastic pollution, the impact on marine ecosystems, and new technologies for observation and removal. Students will also refer to different sectors of the blue economy, in a circular economy perspective, by spreading a message of active citizenship.

LIVE EVENT programme (Italian time)

Date: April 12th 2022

- | | |
|------------|--|
| 11.10 a.m. | OUR PLASTIC WASTE COMES BACK TO US
Students analyse the impact of plastic pollution on human health. |
| 11.15 a.m. | MARINE ANIMALS WITH PLASTIC-FILLED STOMACHS
Students examine the problem of marine animals consuming plastic. |
| 11.20 a.m. | MICROPLASTICS
Students investigate the origin of microplastics and how they can be harmful to our aquatic life. |
| 11.25 a.m. | EFFECTIVE GOVERNMENT RESPONSES TO THE GLOBAL PLASTIC POLLUTION PROBLEM
Students analyse how plastic pollution is a global problem that demands global cooperation. |
| 11.30 a.m. | PLASTIC WASTE – AN UNFAIR TRADE
Students explore the problems faced by plastic waste pickers in developing countries. |

- 11.35 a.m. SEVERAL WAYS TO SPREAD THE MESSAGE LOCALLY
Students look for possible ways to raise awareness of the dangers of plastic pollution.
- 11.40 p.m. Presentation of Lithuanian students about STEAM (IT) Career
- 11.50 p.m. Presentation of Lithuanian students: Proposals for reduction of plastics
- 11.55 p.m. Presentation of Greek students: Game " Without plastics"
- 12.10 a.m. Final discussion and Kahoot game organised by Italian students

During the event questions will be collected in the YouTube chat.
